Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3, 4, 12, 13, 14 and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Bobroff et al. (US Pub 2003/0225373).

Bobroff et al. disclosed an angled infusion set having a cannula assembly including a cannula housing and a cannula extending from the housing, an inserter housing having a bottom wall, a retainer, and a base member that forms an acute angle that is approximately 30 degrees; as well as wherein the first release lever is biased in a second rotational direction opposite the first rotational direction thus causing the lever to engage and hold the retainer (Figures 30-34, 41-58 and entire reference).

3. Claims 1, 3, 4, 12, 13, 14 and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Safabash et al. (USPN 6,293,925).

Safabash et al. disclosed an angled infusion set having a cannula assembly including a cannula housing and a cannula extending from the housing, an inserter housing having a bottom wall, a retainer, and a base member that forms an acute angle that is approximately 30 degrees, as well as wherein the first release lever is biased in a second rotational direction opposite the

first rotational direction thus causing the lever to engage and hold the retainer (Figures 41-49, and entire reference).

Response to Arguments

4. Applicant's arguments, see paper number 14, filed 12/31/03, with respect to the rejections of claims 1, 3, 4, 12, 13, 14, 17 under Clement et al, Mathiasen, Kaufman as well as the 103 rejections have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejections are made.

Conclusion
